

Figure 1 is a line graph showing the percentage of frames with error less than a threshold (Y-axis) versus the error threshold (X-axis). The X-axis ranges from 2 to 7, and the Y-axis ranges from 0 to 1.0. The graph displays six curves, each representing a different method or configuration. The curves generally show an increasing trend as the error threshold increases, indicating that a higher threshold allows for a higher percentage of frames to be considered as having low error.

Error Threshold	Curve 1 (Solid Green)	Curve 2 (Solid Light Green)	Curve 3 (Solid Purple)	Curve 4 (Solid Yellow)	Curve 5 (Dashed Red)	Curve 6 (Dashed Black)
